DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 5,962,140 (Rajagopalan).

The reference discloses a golf ball having a core and/or intermediate layer comprising a functionalized fluoropolymer, which reads on the presently claimed fluoropolymer (a), blended with another polymer(s). Suitable polymers that can be combined with the fluoropolymer include polycaprolactone and poly(urethane-caprolactone), each of which reads on the presently claimed polycaprolactone (b), (column 15, lines 17 and 20).

In essence, the disclosure of the reference differs from the presently claimed subject matter in not expressly exemplifying the employ of a polycaprolactone polymer as the polymer used in conjunction with the functionalized fluoropolymer. It is maintained that it would have been obvious to one having ordinary skill in the art and *within the purview of the reference* to have blended a polycaprolactone with the functionalized fluoropolymer with the reasonable expectation of success. Accordingly, no patentability can be seen in the presently claimed subject matter.
